

decotric Adhesion reinforcement decotric Klebkraft-Verstaerker

Additive to wallpaper pastes to increase adhesive force and moisture resistance

Instructions for use:

decotric Adhesion reinforcement is perfectly suitable as an additive to wallpaper pastes when glueing heavy wallpapers in moist rooms and in difficult areas. *decotric Adhesion reinforcement* improves both the initial adhesion and the final adhesion force even on low-absorbency surfaces.

Technical data:

Components:	Polyvinyl acetate-ethylene dispersion
pH value:	approx. 10
Density:	approx. 1.03 g/cm ³
Consumption:	750 g tackifier per 200 g package of paste (increase quantity for larger packages correspondingly)

Application:

Stir in *decotric Adhesion reinforcement* thoroughly into the ready-dissolved wallpaper paste. The optimal additional quantity is approx. 15-20 %, for example, one 750 g can of *decotric Wallpaper and Border Adhesive* on 4 l of prepared wallpaper adhesive.

Remove adhesive residues immediately using a damp cloth.
Do not process below +5° Celsius sub-floor and room temperature!
Clean any working equipment with water after use.

Storage:

Keep cool but protected from frost! Keep container well closed!

Available size:

PE can of 750 g each 008401001
