

decotric Styrofoam Adhesive – Tube decotric Styroporkleber – Tube

Ready to use, white, solvent-free emulsion-based adhesive for interior polystyrene and hard foam panels.

Instructions for use:	<i>decotric Styrofoam Adhesive - Tube</i> is suitable for gluing decorative sections, rosettes and décor panels made from compacted and foamed polystyrene, hard foam and polyurethane.	
Technical specifications:	Components:	terpolymer emulsion, fillers, thickening agents
	pH-value:	approx. 8-9
	Density:	approx. 1.70 g/cm ³
	Usage:	approx. 12-20 m per tube
Surface preparation:	The surface must be absorbent, dry, firm and free of release agents (dust, grease, etc.) Remove loose masonry, old wallpapers and flaking paints. Make good cracks, holes and unevenness using <i>decomur Super Bonding Filler</i> or <i>decofill Interior</i> . Pretreat highly absorbent, sanding and chalking surfaces using <i>decotric Deeply Penetrating Primer – Solvent Free</i> .	
Application:	Knead the tube well before use. Apply <i>decotric Styrofoam Adhesive - Tube</i> to the material to be glued in dots or strips and then evenly press onto the surface. Where there are stresses between the materials to be glued and when using on heavy materials, it is necessary to fix the glued objects until the adhesive dries. Immediately remove residual adhesive with water Do not use if the surface and/or room temperature are below + 5° Celsius! Clean tools in water after use.	
Storage:	Store in a cool place! Keep tube tightly sealed!	
Available size:	400 g PE tube	001106001
