

decofill Quick-Repair Filler

The fast and clean solution for repairing dowel holes and small cracks.

Area of application: The fast and clean solution for repairing dowel holes, small cracks and similar damages indoors and in wet rooms. The smooth filling compound is applied directly out the tube. The material is easy to smooth and hardens without cracking.

Technical specifications:

Components:	styrene-acrylic emulsion, filling compound, additives
Colour:	White
Density:	approx. 1.80 g/cm
pH-value:	approx. 8-9
GISBAU	M-DF02

Surface Preparation: decofill Quick-Repair Filler is suitable for the application on all mineral surfaces (render, concrete and masonry) such as wood-chip and painted surfaces indoors. Not suitable for the application on wood, glass, plastic and metal.

The surface has to be dry, firm, free of dust and grease. Highly absorbent, sandy and chalky surfaces have to be treated with a primer

Application: Knead the tube well before use. Apply the filler and smooth out or apply a structure if desired. Layer thickness up to 5 mm can be applied in one go. For thicker layers wait until the filler has dried completely and apply a second layer.

Do not process if temperature is below +5°C. Clean tools with water after use.

Storage: Store in a cool and dry place! Keep the container tightly sealed out of reach of children.

Available sizes: 400 g tube 032601001
