

# decotric Alkaline/Leaching Agent - Liquid Concentrated Solution - decotric Anlauger, Konzentrat Aktivreiniger

Makes adhesive, clean surfaces for subsequent lacquer finishes.

**Instructions for use:**

*decotric Alkaline/Leaching Agent – Liquid* is the ideal surface preparation of lacquered surfaces prior to subsequent lacquer finishes. Grease and other contaminations difficult to remove are eliminated from the paint surface resulting in an adhesive and clean surface. *decotric Alkaline/Leaching Agent - Liquid*, is most suitable for cleaning inaccessible surfaces which cannot be sanded (e.g. radiators).

Not suitable for cleaning metals (e.g. aluminium, zinc, etc.).

**Technical data:**

Components:	Surfactants and phosphates
Density:	1.09 g/cm <sup>3</sup>
pH value:	approx. 12.5
Mixing ratio:	250 ml in 3-5 l
Consumption:	50-100 ml/m <sup>2</sup> of the thinner

**Application:**

Dilute 250 ml of *decotric Alkaline/Leaching Agent - Liquid* with 3-5 l water depending on contamination and surface quality. Apply the thinner using a sponge, brush or scrubber and clean the surface as intensively as possible. Use only brushes or scrubbers with plastic bristles! Thoroughly rinse with clear water after a contact time of 10-15 minutes.

Cover glass and metal parts prior to treatment. Protect surfaces which are not to be treated from atomized spray and splatters. Immediately remove any splatters with water.

Clean any working equipment with water immediately after use.

**Important information:**

Please see the EU Safety Data Sheet for all safety-related data (EU-CLP).

**Storage:**

Store in a cool place. Keep the containers tightly sealed!

**Available size:**

250 ml PE bottle	004901001
