

# aka soluwash S – Universal Special Cleaner

## aka soluwash S - Universal-Spezial-Reiniger

Water emulsifiable cleaning agent for problem-free cleaning of brushes and paint rollers.

**Instructions for use:** *aka soluwash S* removes fresh paints, varnishes, oils, greases and tar from brushes, paint rollers, metal parts, etc.

**Technical specifications:**

Components:	aromatic hydrocarbons, emulsifier
Density:	approx. 0.89 g/cm <sup>3</sup>
Flash point:	approx. 32° C

**Application:**

Immediately after use, immerse brushes in *aka soluwash S*, squeeze out thoroughly in a cloth and rinse out under running water. Place small metal parts in *aka soluwash S* and after leaving to act for an adequate time rinse out with plenty of water. Coat large parts with *aka soluwash S* and after leaving to act for a suitable time also rinse off thoroughly with water. If necessary, repeat this procedure. Not suitable for cleaning plastics which are softened or dissolved by solvents. If necessary, try out *aka soluwash S* on an unnoticeable area first to check its effect. Attention: Do not use *aka soluwash S* on absorbent surfaces (e.g. cement screed) due to possible lasting odour nuisance.

**Important information:** Please see the EU Safety Data Sheet for all safety-related data (EU-CLP).

**Storage:** Store in a cool place! Keep containers tightly shut! Keep away from naked flames and other ignition sources. Keep container in a well-ventilated place.

**Available sizes:**

250 ml PE bottle	071001000
1 l PE bottle	071005000
